

top coat

“On-Site Solution to the Variable Conditions”

plus

N.D. Liquid
Nano.Diamond.

No Stuck on dirty/wet snow.

Must-have for the massive resistance of dirty and polluted old snow. Easy application on the slope for surprising joy.
*Application: Splay on the base directly, and spread with “MicroCloth”

plus

N.D. RUB ON
Nano.Diamond.

A Small Twist for One Extra Performance.

Covering the base with the final layer of rub-on wax for extra acceleration.
*Application: Rub this solid wax on the base directly, and polish it into the base using included portable cork or “kossymix cork”. Then brush the base with a metal brush to remove excess wax.

glide wax

(Hot Waxing)

(C)75< (F)167<
*Vent the room well while ironing

The Mighty Glide Wax, The Combination with “N.D.Foundation” Works Best from the Wet Snow to the Dry Powder.

The gliding wax with trinity of 3 different paraffin solidity. And 1 another gluing paraffin to create firm but elastic layer of gliding surface. As a result, it works on the wider range of snow conditions than “Kossymix Origin” . Works with the base of “N.D. Foundation” , to reduce the friction on any conditions from new dry powder to warm wet snow.

base wax

(Hot Waxing)

(C)70< (F)158<
*Vent the room well while ironing

Fundamental Wax to Flood the Base with “Nano-Diamond”

Apply this base wax by ironing several times for the best to soak the purified paraffin and “Nano-Diamond” evenly into the base. Fine textured base with it is the key to have durable and low friction gliding surface.

base make series

(Liquid Base Wax)

Toner

Treat the Base with Liquid Paraffin. From Minus to Zero

Treat like the lotion to percolate low-volatile paraffin and “Nano-Diamond” into the base more effectively than solid hot-wax.

Dry it for at least 20 to 60 min (a day for the best result), then polish the base again with “Conditioning Paper” to open the base for better hot-wax absorption.

*Application: Splay and spread directly throughout the base, and dry well.

Serum

Works as the cleansing liquid for the skin-care.

Dissolve the old wax and stain by the high-volatile paraffin, and soak “Nano-Diamond” into the base material.

*Application: Shake well before using. Splay directly on the base, then spread and polish with clean cloth.

Start

(Pre-Wax)

Refine the Base Well for the Best Result

premium scraper > Metal Brush > **Conditioning Paper**

Brush the surface evenly to “open” the base.
